

DAIN: The Domestic Abuse Information Network

Sample reports

DAIN is a central component of the Duluth Domestic Abuse Intervention Project. A Microsoft Access-based program, it is available from the DAIP Training & Resources Catalog (www.duluth-model.org).

A number of pre-formatted reports are included with DAIN. In addition, users may develop their own queries and reports.

Samples of both types of reports are shown here.

Please see the DAIN flyer for more information about the software.
